

# OnSight 360

Rapid Deployment Video Surveillance

**ACCESS LIVE AND RECORDED VIDEO OVER CELLULAR NETWORKS, WIFI OR INTERNET**

The OnSight 360 is a rapid deployment video surveillance system. It is useful for observing remote areas, or for events that need video coverage where none exists.

Installation is simple by using the provided mounting frame or pole mount bracket.

The system can be mounted and powered in minutes. It requires 110VAC and is self starting when powered.

The system can be observed via network, either wired or through the wifi hotspot it provides. It can also be observed via the internet, either wired or cellular.

The OnSight 360 can be observed with web-enabled mobile devices as well.

It is made from a NEMA 4 rated enclosure, with UL rated wiring. It can be configured for U.S. or foreign power grids.

The cameras are 1.3 megapixel (standard), but can be upgraded to 5.1 megapixel.

The client software is license free and provides both live and forensic zoom. Multiple operators can connect at the same time and each operator can view multiple systems simultaneously.

- \* Full DVR Capabilities
- \* Access Over WIFI or Internet
- \* Easily Transported
- \* Three 1.3 Megapixel Cameras (Standard)
- \* Pole Mount and Wall Mount Included
- \* 500GB Hard Drive (Standard)
- \* Built In Battery Backup
- \* External Status Lights
- \* External Grounding Lug
- \* Mounting Frame For Easy Installation
- \* Temperature Controlled Fans
- \* Low Power Consumption

#### Technical data:

21"h x 18"w x 18"d

Overall weight : 34 lbs

Operating temp range : -10 deg.F - +120 deg.F

Power required : 110VAc/220VAC

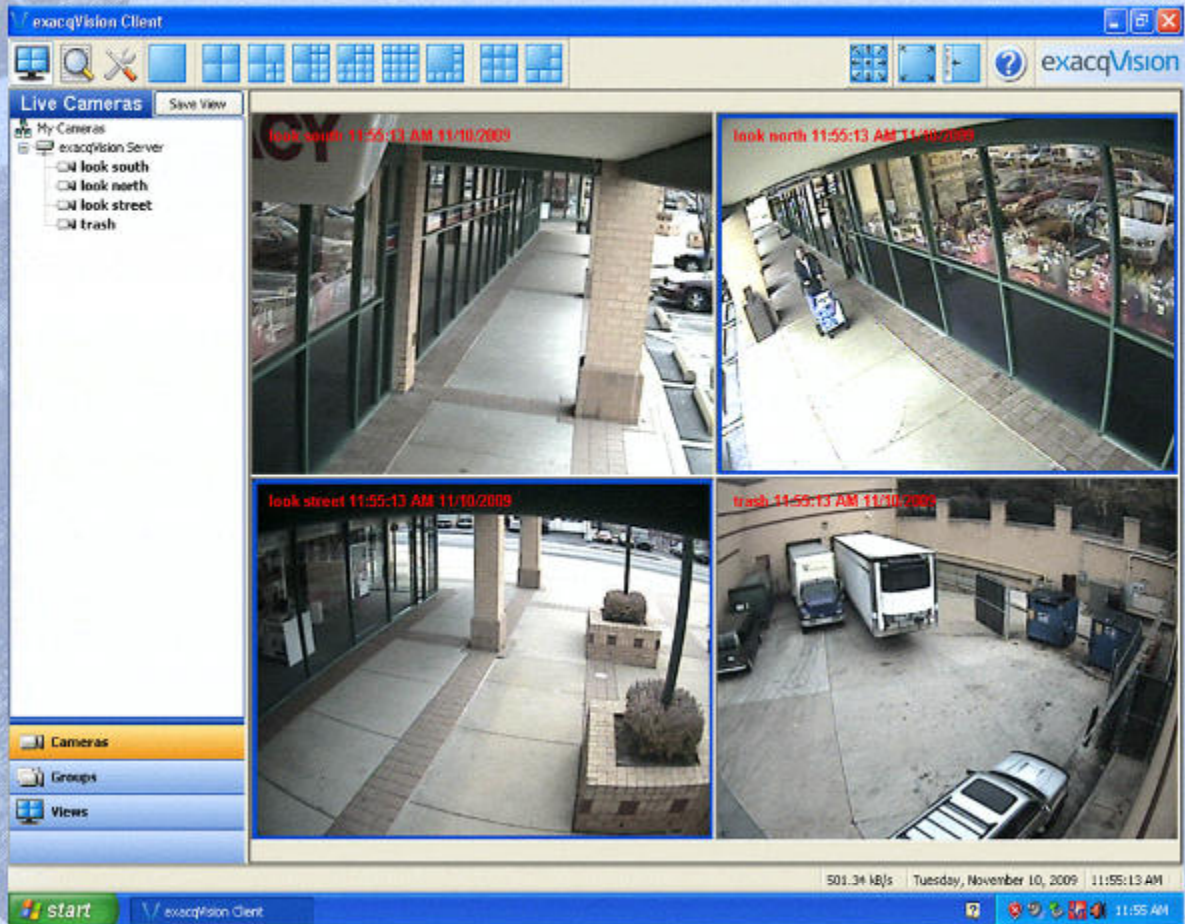

Network : Ethernet 10/100

Internet : high speed static bridged ip

Operating system : Windows XP Pro Sp2

Client machine : Windows XP or better, or MAC OSX

#### Product User Interface Description:

The exacqvision VMS (Video Management System) software comes pre-installed on all exacqVision Hybrid and IP Servers, and also installs on commercial off-the-shelf (COTS) servers running Windows or Linux.

exacqVision VMS creates an advanced security solution, providing recording of the latest, state-of-the-art IP video surveillance cameras. The powerful, yet easy-to-operate client user interface installs on any standard computer running Windows, Linux or Mac OS X and can connect to multiple exacqVision Hybrid (analog and IP cameras) and IP Camera Servers creating a virtually unlimited amount of cameras and protection. Video from all exacqVision systems can also be accessed with web browsers and mobile devices with access to the internet.

#### Features:

- \* Each server is expandable to up to 64 IP cameras.
- \* Simple and cost-effective to add additional IP camera licenses.
- \* Supports latest IP camera technology including multi-megapixel cameras and H.264 compression.
- \* Supports IP cameras and encoders from multiple manufacturers.
- \* Digital PTZ functionality on all cameras in live and recorded mode.
- \* Intuitive user interface requires little to no training.
- \* Common client connects to multiple exacqVision servers to create scalable networks.
- \* Easy-to-use, powerful video and audio export features.
- \* Multi-monitor client display. Drag and drop cameras between monitors.
- \* MPEG4, Motion JPEG and H.264 video compression.
- \* Graphical search display for all cameras and recorded audio.
- \* Easy to use multi-camera playback and export.
- \* Definable user permissions and privileges.
- \* Access video with most web browsers and mobile devices with internet access.
- \* Wide-screen client views.
- \* SmartSearch.
